

An activity created by Glen Eira City Council and Growing Green Thumbs.

Growing seeds

What you will need

Recycled container
(egg carton, egg shells, donut boxes, yoghurt pots)

Seeds

Soil/dirt

Icy pole sticks

Black marker

Watering can

Step one

Fill each container loosely with soil.

Step two

Gently push one to two seeds in each container.
Ensure the seed is covered lightly with soil.

Step three

Label your seed pots with what you have planted.

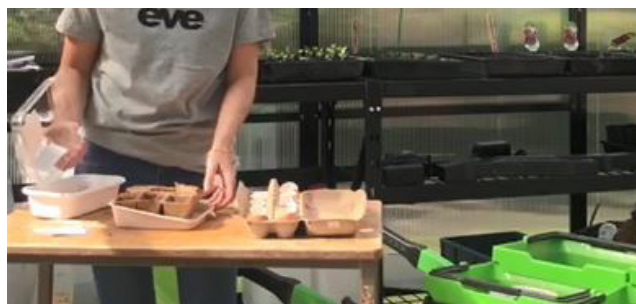

Step four

Water lightly and place in a warm sunny spot.
Remember to water every few days.

Step five

When the seedling has about five leaves,
plant it into the garden.
If you have used a pot made of paper or
cardboard (natural material), this can go into the
ground. If you have used a plastic container,
you will need to remove this before planting.

Happy planting.
