Statement of significance:

This tree fulfils the criteria of:

- Horticultural or Genetic Value
- Unique Location or Context
- Rare or Localised Distribution
- Particularly Old Specimen
- Outstanding Size
- Aesthetic Value
- Outstanding Example of Species
- Outstanding Habitat and Biodiversity Value

This healthy, mature Manna Gum has no structural faults or issues and could represent a good source of propagating stock in the future. It is an isolated and iconic tree, with only a few mature examples of the species within GECC. The tree is particularly large, with significant trunk girth and wide spreading canopy that is highly visible and contributes to the neighbourhood character. It is an old tree predating much of the urban development of the area that attracts a wide range of native bird life. Its size and health make it an outstanding example of the species.
