Statement of significance:

This tree fulfils the criteria of:

- Unique Location or Context
- Outstanding Size (girth height spread)
- Aesthetic Value
- Outstanding Example of the Species
- Outstanding Habitat Value

This is an uncommon tree species for a private suburban garden in the region that provides a major contribution to the local landscape. It is the tallest tree in the surrounding area with good potential to maintain healthy growth and become an iconic feature specimen.

The tree is a well-formed example of the species that provides significant canopy coverage which contributes to the neighbourhood character. The loss of this tree would result in a substantial loss of amenity to the local community.

Residents have reported this tree as being used for roosting by native Owls and Tawny Frogmouths as well as other bird species.
