

Glen Eira Classified Tree Register

TREE REPORT

Tree number: 46/CTR/2020

Date of Assessment: 13/05/2021

Assessing Officer: Christian Renaud

Tree Owner: Council Tree

Address: Woorayl St, Carnegie

Location: Public Open Space

Record type: Single Specimen Tree

Number of trees: 01 of 12

Botanical name: *Eucalyptus camaldulensis*

Common name: River Red Gum

Structural Root Zone (SRZ): 4.1m

Approximate age: 300+ years

Diameter at breast height: 147cm

Tree Protection Zone (TPZ): 15m

Tree height: 22m

Tree canopy width: 25m

Easting: 329428.8

Northing: 5804970.7

Glen Eira Asset ID: TS73644

Statement of significance:

This tree fulfils the criteria of:

- Horticultural or Genetic Value
- Unique Location or Context
- Particularly Old Specimen
- Outstanding Size (girth height spread)
- Aesthetic Value
- Outstanding Example of the Species
- Outstanding Habitat Value

This remnant tree represents an important horticultural resource as possible propagating stock for locally indigenous trees. It is one of only a few remaining remnant trees within Glen Eira as the tree predates colonial settlement with an approximate age of 300+ years and has an impressive canopy spread and significant trunk girth of over 4.6m around.

This is an iconic tree affectionately named "Rosie" that makes a major contribution to the local landscape and neighbourhood character. Together with the other possible remnant and self-sown River Red Gums in the Carnegie Railway Precinct, they provide substantial canopy coverage and local amenity. On her own, "Rosie" represents an outstanding example of the species within the Council.

The Carnegie cluster of River Red Gums has been identified in the "Biodiversity in Glen Eira" report as representing a biodiversity hotspot, forming a key wildlife corridor along with the River Red Gums within the Murrumbeena Railway Precinct.
