**Tree canopy width:** 14m

**Easting:** 326540.3

**Northing:** 5806772.9

**Glen Eira Asset ID:** TP102064

### Statement of significance:

This tree fulfils the criteria of:

- Aesthetic value
- Curious growth habit
- Outstanding example of the species

This mature South African Bushwillow located on the Inkerman Rd frontage of Caulfield Park is younger and smaller than the other nearby significant Bushwillow, however it is also striking within its location and makes a major contribution to the local landscape and neighbourhood character.

The tree provides substantial amenity to park users and the wider community as its curious growth habit provides shading over the walking track and visual interest with arching limbs that reach the ground and rise up again.

This healthy tree is an outstanding example of the species to be found within the entire municipality and has potential to be a significant and long lasting feature of the area.
